Statement: Water-Shield Installation

June 24, 2015, Auburn Hills, Mich. - FCA US LLC is voluntarily recalling an estimated 99,436 SUVs in the U.S. to install shields that protect their power liftgate control modules, and related components, from moisture.

FCA US LLC began an investigation after learning of a reported vehicle fire. The probe revealed power liftgate control modules in certain SUVs may be inadvertently exposed to water.

This may cause a short-circuit, creating a fire hazard. However, the Company is **unaware of any related injuries or accidents.**

The campaign affects model year 2014 and 2015 Jeep Cherokee SUVs, but is **limited to vehicles equipped with power liftgates.**

An estimated 13,195 customers are affected in Canada, along with an estimated 2,406 customers in Mexico and 48,966 outside the NAFTA region. The estimated total recall population is 164,003.

All affected customers will be advised when they may schedule service. If the modules show signs of water exposure, they will be replaced. All recall-related work will be performed free of charge.

In the interim, the cargo areas of 2014-15 Cherokees equipped with power liftgates should be monitored and kept dry. Customers with questions may call the FCA US Customer Information Center at 1-800-853-1403.
