

2017 Jeep® Grand Cherokee 4x4 Earns Five-star Overall Safety Rating

- 2017 Jeep® Grand Cherokee 4x4 earns five stars for overall performance; highest rating in NHTSA's vehicle evaluation program
- Five-star ratings in each of three separate NHTSA crash tests – frontal barrier, side barrier and side pole
- Available Full-Speed Forward Collision Warning with Crash Mitigation features sensor-fusion technology, which leverages attributes of radar and camera
- Fourth consecutive year Jeep Grand Cherokee has earned this distinction
- 2017 Jeep® Grand Cherokee 4x4 starts at \$32,695 (excluding destination)

November 27, 2016, Auburn Hills, Mich. - The [2017 Jeep® Grand Cherokee](#) 4x4 has earned a five-star overall safety rating from the U.S. National Highway Traffic Safety Administration (NHTSA).

Five stars is the highest single rating in NHTSA's vehicle-evaluation program.

The 2017 Jeep Grand Cherokee 4x4's five-star rating reflects performance in NHTSA tests that simulate:

- A frontal collision with another vehicle
- A side impact with another vehicle
- A side impact with a pole

The Jeep Grand Cherokee 4x4 earned top marks – five stars, the highest possible rating – in each test.

The 2017 Grand Cherokee comes with more than 70 available safety and security features. Among its standard-equipment items are:

- advanced multistage, driver and front-passenger air bags
- advanced side-curtain air bags
- advanced supplemental front-seat side air bags
- and a driver-side inflatable knee bolster

And while restraint systems are critical to the Company's safety strategy, crash-avoidance technology is also a high priority. Available on the 2017 Jeep Grand Cherokee is an Automatic Emergency Braking (AEB) system called Full-speed Forward Collision Warning with Crash Mitigation.

The system features [sensor-fusion technology](#), which leverages the combined benefits of cameras and radar. The technology affords greater object-detection precision because camera and radar must agree before Full-speed Forward Collision Warning with Crash Mitigation will deploy.

If camera and radar agree that a frontal impact with another vehicle appears imminent, the system pre-fills the Grand Cherokee's brakes and transmits audible and visual warnings urging the driver to react. If there is no driver response, the system triggers a brief brake application as a tactile alert.

If the driver remains unresponsive and frontal collision risk remains, the Grand Cherokee's brakes are applied to slow the vehicle before impact. The system may bring the vehicle to full stop if an imminent frontal collision is detected at speeds below 25 mph.

Sensor-fusion technology was once reserved for luxury-segment vehicles. Today, FCA US makes it available across six vehicle segments – from small SUV to minivan.

NHTSA acknowledges AEB as a preferred technology, though its benefits are not factored into the agency's ratings.

This marks the fourth consecutive year the Jeep Grand Cherokee 4x4 has earned a five-star safety rating from NHTSA.

The 2017 Jeep Grand Cherokee 4x4 starts at \$32,695, excluding destination.

Jeep Brand

Built on more than 80 years of legendary heritage, Jeep® is the authentic SUV brand that delivers legendary off-road capability, interior refinement, high-tech features and versatility to people who seek extraordinary journeys. The Jeep brand delivers an open invitation to live life to the fullest by offering a broad portfolio of vehicles that continues to provide owners with a sense of safety and security to handle any journey with confidence. Jeep Wave, a premium owner loyalty and customer care program that is available to the entire Jeep 4x4 lineup, is filled with benefits and exclusive perks to deliver Jeep brand owners the utmost care and dedicated 24/7 support. The legendary Jeep brand's off-road capability is enhanced by a global electrification initiative that is transforming 4xe into the new 4x4 in pursuit of the brand's vision of accomplishing Zero Emission Freedom and added 4x4 capability. All Jeep brand vehicles will offer an electrified variant by 2025.
