Statement: Chrysler Pacifica Hybrids to Start Shipping to Dealers April 17

March 31, 2017, Auburn Hills, Mich. - As with all launches, but particularly in the case of this technically advanced vehicle, we are taking great care to ensure that the Pacifica Hybrid comes off the line with the highest quality possible. We will only introduce a vehicle when we are fully satisfied the vehicle meets or exceeds customer expectations.

We have been ramping up the build at the Windsor Assembly Plant, and full retail production will now begin on Friday, April 7. Vehicles will start shipping to dealers on Monday, April 17.
