2007 Chrysler 300: Elegance and Performance at an Affordable Price

August 31, 2006, Auburn Hills, Mich. -

Epitomizing Chrysler brand's tradition of innovative design, the modern elegance of the Chrysler 300 continues to make everything else on the road seem ordinary. The dramatic exterior design of the Chrysler 300, along with sophisticated interior amenities and command-of-the-road technologies, helped establish a new large-car formula that includes style and performance not easily copied.

Proving once again that more is better, new for 2007 is the Chrysler 300 W. P. Chrysler Executive Series. This rear-wheel-drive long wheelbase package is available with two engine options; the Chrysler 300 Touring model, equipped with the 3.5-liter High Output V-6 engine, and the Chrysler 300C model featuring the modern 5.7-liter HEMI® V-8 engine. The Executive Series package adds 6 inches to the standard wheelbase and provides more than 46 inches of rear legroom – more than the long-wheelbase Audi A8L, BMW 750Li and Jaguar XJ8L.

Also available on the 2007 Chrysler 300 are new features that include SmartBeam® Headlamps, heated rear seats, auto-dimming passenger-side exterior mirror and supplemental turn signal mirrors with courtesy puddle lamps. These technologies and refinements continue to offer customers an elegant, confidence-inspiring vehicle at an exceptional value.

Equipped with integrated safety and security features, all 2007 Chrysler 300 rear-wheel- and all-wheel-drive models provide excellent occupant protection on the road. The National Highway Traffic Safety Administration (NHTSA) rated the Chrysler 300 five stars for driver and front-passenger protection in a frontal crash, the highest rating in the U.S. government's safety crash-test program.
