View Video Demonstrations of Unique Features on the 2007 Chrysler PT Cruiser

YES Essentials® Seat Fabric

What it does: Offers three key benefits: repelling stains, controlling odor and reducing static electricity. Dual-action technology repels and releases spills that would stain other auto fabrics. This technology also allows the upholstery surface to dry quickly. In addition, YES Essentials seating fabric reduces static electricity generated when entering or exiting the vehicle – a first for improving the comfort of drivers and occupants.
