| 3. The recommended tongue weight is 10 percent of the gross trailer weight. However, the maximum tongue weight on Class III (the bumper ball) is limited to 500 pounds, and Class IV (the receiver hitch) to 1,045 pounds. Additionally, the GAWR's and GVWR's should never be exceeded. |            |              |            |        |         |             |       |       |       |        |        |             |
| 4. The maximum trailer weight is 5,000 pounds for a weight-carrying hitch. A weight distributing system is recommended for trailers over 5,000 pounds.                                                                                                                                   |            |              |            |        |         |             |       |       |       |        |        |             |

| 3. The recommended tongue weight is 10 percent of the gross trailer weight. However, the maximum tongue weight on Class III (the bumper ball) is limited to 500 pounds, and Class IV (the receiver hitch) to 1,045 pounds. Additionally, the GAWR's and GVWR's should never be exceeded. |            |              |            |        |         |             |       |       |       |        |        |             |
| 4. The maximum trailer weight is 5,000 pounds for a weight-carrying hitch. A weight distributing system is recommended for trailers over 5,000 pounds.                                                                                                                                   |            |              |            |        |         |             |       |       |       |        |        |             |
