September 1, 2016, Auburn Hills, Mich. - The ProMaster is Ram Commercial's entry for the Class 2 full-size van segment. Ram's full-size van benefits from an exclusive front-wheel-drive system, reducing weight and complexity by locating all components beneath the cab. This keeps the cargo load floor height and step-in height very low, which is a great feature for the person getting in and out of the van all day. It also helps in low-traction surfaces, like snow, since there is always weight on the front wheels to provide traction. Coupled with both gas and EcoDiesel powertrain options, the result is a purpose-built, highly customizable van designed to exceed the demands of commercial customers and upfitters.

### Highlights

- ProMaster best-in-class features:
  - Standard V-6 horsepower
  - Turning diameter
  - Standard interior cargo height
  - Load floor height
  - Cargo width between wheel wells
- The 2017 Ram ProMaster features the 3.6-liter Pentastar V-6 engine and a torque-laden, 3.0-liter EcoDiesel I-4 engine. The engines are paired, respectively, with a proven six-speed automatic transmission and an electronically controlled Dual Active Drive six-speed automated manual for outstanding fuel economy
- The Ram design team started with a functional exterior and interior, adding distinct Ram styling while adapting the full-size van for North America
