Method of Determining Monthly Sales. FCA US's reported vehicle sales represent unit sales of vehicles to retail and fleet customers, limited deliveries of vehicles to others such as its officers, directors, employees and retirees and vehicles used for marketing. Reported vehicle unit sales do not necessarily correspond to reported revenues, which are based on FCA US's sale and delivery of vehicles, and typically recognized upon shipment.

Sales from dealers to retail customers are reported to FCA US by dealers through a new vehicle delivery reporting (NVDR) system which then compiles the reported data as of the end of each month. In certain circumstances in which the customer or end user is known at the time of shipment, including fleet sales, vehicle unit sales are reported through FCA US's management reporting system based on management's determinations. These determinations may be made after the dates on which vehicles are shipped; however, all vehicles reported as sold in the monthly sales report have been shipped, and FCA US has recognized revenue with respect to such vehicles, at or prior to the date on which the vehicle unit sale is reported.
