## 2019 Fiat 500e Fact Sheet

September 1, 2018, Auburn Hills, Mich. - With its iconic style, world-class dynamics and environmentally responsible zero-emissions design, the Fiat 500e builds on the Cinquecento legacy, while offering customers a no-compromise electric vehicle that embodies the FIAT brand's simple, purposeful and fun-to-drive values. Available in California and Oregon, the Fiat 500e electrifies the Cinquecento lineup with even more innovation and style, an EPA-tested 84 miles of driving range and 112 miles per gallon equivalent (MPGe) combined rating of pure battery-electric power (121 MPGe city).

### Highlights

- Designed to be a Fiat 500 first and foremost, this no-compromise electric vehicle (EV) builds on the Cinquecento's successful small-car formula, while adding a liquid-heated/cooled battery-electric powertrain that produces 111 horsepower (83 kW)
- 2019 Fiat 500e recharges in less than four hours with its 6.6 kW on-board charging module (OBCM) connected to a Level 2 energy source (220 volts)
- When put through its paces, the aerodynamically styled Fiat 500e was rated with 103 highway MPGe and 84 miles of combined city and highway driving range by the Environmental Protection Agency (EPA). And, with the Cinquecento's regenerative braking system, drivers will typically exceed 100 miles of driving range in the city – all without any tailpipe emissions
- Unlike other EVs in the market that have an aggressive and unwanted "drag" feeling when lifting off the accelerator pedal, the 2019 Fiat 500e is designed to feel like a regular gasoline-powered Cinquecento, while still immediately regenerating. In most cases, the Fiat 500e uses 100 percent of its regenerative braking capability all the way down to 8 miles per hour (mph) in order to maximize the vehicle's efficiency, while enabling longer life of the brakes
- 2019 Fiat 500e pushes its iconic Italian design forward with its wind-tunnel-sculpted shape and retro-futuristic dot-matrix styled cues for a cutting-edge look. Inside, Fiat 500e fuses retro-futuristic design with unique EV technology elements for an environment that combines simplicity with innovation:
  - Seven-inch thin-film transistor (TFT) instrument cluster displays full-color picture graphics to illustrate vehicle functions, charge levels and trip summary
  - Uconnect 5.0 system with a 5-inch touchscreen enables hands-free calling via Bluetooth-equipped phones, as well as voice command control of AM/FM and optional SiriusXM Radio and navigation system
  - Uniquely designed electronic shifter with easy-to-use push-button transmission mode selection

### Model Lineup

The Fiat 500e lineup consists of two models:

- 500e
- 500e E-Sport

### Available Exterior Colors

- Luminosa Orange
- Metallo Gray
- Granito Gray
- Pompei Silver
- Vesuvio Black Pearl
- Perla White Tri-coat

## Available Interior Colors

- Steam
- Nero

## About FIAT Brand

Celebrating its 120th anniversary in 2019, head-turning Italian design and the ultimate fun-to-drive factor come standard with every FIAT. That philosophy is embodied by the iconic Fiat 500 or Cinquecento – a small car that lives big. Born in Italy and rooted in a rich heritage, the 500 is now sold in more than 100 countries.

In North America, the Fiat 500 was introduced in March 2011 and was soon followed by the Fiat 500c (Cabrio), the high-performance Fiat 500 Abarth and Abarth Cabrio, the fully electric Fiat 500e, the five-passenger Fiat 500L and the all-wheel-drive Fiat 500X crossover. The FIAT brand continued its expansion with the introduction of the Fiat 124 Spider, a revival of the iconic roadster that combines Italian style, performance and engaging driving dynamics.

The FIAT brand now offers standard turbo powertrains that deliver at least 30 mpg across the entire product lineup.
