FCA Canada: 2019 Dodge Charger Enforcer Fact Sheet

August 21, 2018, Windsor, Ontario - Dodge recognizes that the heroic men and women who protect us must be equipped with the best-performing pursuit-rated vehicle, loaded with tactical equipment and technology. And for 2019, the Dodge Charger Enforcer continues to deliver world-class safety and security and segment-first technology. Charger Enforcer comes with FCA's exclusive, no-cost Officer Protection Package, available with the Fleet Park Assist Group. This package is designed to provide officers with rear vision and enhanced officer safety when parked and working inside their vehicle. When activated, the rear-facing camera and sensors detect movement behind the vehicle, giving officers an extra set of eyes in the backs of their heads. When motion is detected, images automatically appear on the vehicle's Uconnect interactive touchscreen - and any or all of the following can be programmed to occur: alert chimes sound, reverse lights and tail lamps flash, windows roll up and all doors lock.

The available Uconnect 12.1-inch display integrates law enforcement systems and innovative technology to improve safety and occupant space. In addition to the pursuit-rated hardware that includes 370 best-in-class horsepower (hp) and factory-installed Mopar upfit packages, Charger Enforcer offers the segment's most advanced all-wheel-drive (AWD) system for maximum tactical performance, all-weather traction and fuel-efficiency.

New for 2019:

- Greater range of screen brightness settings to better accommodate individual officer preferences
- Usable area on Uconnect 12.1-inch touchscreen has been increased to 97 per cent (from 87 per cent)
- New USB connectivity increases tracking and input speed for keyboard and mouse

Highlights:

- Standard Uconnect 7-inch display and rear camera
- Rear Camera View is a standard feature on the 7-inch display, which activates the rear camera and lets officers see behind the vehicle while driving or stationary
- Available at no cost on the Charger Enforcer when equipped with the Fleet Park Assist Group, the Officer Protection Package is designed to increase an officer's situational awareness when parked and working inside the vehicle, using the Charger Enforcer's Park-Sense Rear Park Assist System, ParkView Rear Back-up Camera and Rear Cross-Path detection to alert an officer if anyone is behind the vehicle
- Available Fleet Park Assist Group includes Blind-spot Monitoring and Rear Cross Path detection
- Charger Enforcer V-8 and V-8 AWD models deliver 370 best-in-class hp
- Legendary performance: Charger Enforcer V-8 set the fastest-ever lap time at the 2012 model year Michigan State Police (MSP) Vehicle Evaluation (1:33.70) at the Grattan Raceway in Belding, Michigan.
- Charger Enforcer V-8 AWD model includes the segment's most technologically advanced AWD system with a segment-exclusive active transfer case and front-axle-disconnect system to improve real-world fuel economy
- Pursuit-rated hardware: performance-tuned suspension, load-leveling NIVOMAT shocks, 14.5-inch front and 13.8-inch rear pursuit-rated brake package, front- and rear-stabilizer bars, 18-inch performance tires on steel wheels and two-mode electronic stability control (ESC)
- Ballistic door panels for driver and passenger doors (Protection: NIJ Level III+) are just one of the many factory-installed Mopar upfit equipment items that include a three-year/60,000-kilometre warranty
- Fuel economy up to 9.0 L/100 km (31 mpg) highway with aluminum 3.6-litre Pentastar V-6 engine with 292 hp, 260 lb-ft of torque and available E-85 flex-fuel capability
- Charger Enforcer leads in tactical technology with a laptop-size 12.1-inch touchscreen display that integrates law enforcement systems into the Uconnect touchscreen system, allowing for quick toggling between vehicle controls and nearly every police-designed computer system that can be stowed in the

trunk

- Charger Enforcer's instrument panel helps law enforcement officers keep their eyes on the road, and unlike third-party solutions that require a bulky console-mounted computer screen, does not obstruct front-driver and passenger air bags or interfere with occupant space
- For added upfit equipment control and capability, the available Uconnect 12.1-inch display also provides Charger Enforcer with a fourth auxiliary button, making installation of upfit equipment easier, as the system can provide the appropriate power, ground and fusing for a variety of LED, lighting, siren, computer, modem or camera systems
- Charger Enforcer's Uconnect systems are engineered and tested to work with an officer wearing gloves, plus extreme operating conditions as low as -40 degrees Celsius and as hot as 85 degrees Celsius
- Available Gross Vehicle Weight Rating (GVWR) of 2,472 kg (5,450 lb) with 3.6-litre Pentastar V-6 engine
- Driver-focused cockpit is designed to be a mobile command centre with world-class materials, police-duty upgrades and state-of-the-art technologies
- For added convenience, the steering wheel includes re-mappable auxiliary buttons that can be programmed to operate aftermarket police equipment
