Dodge Direct Connection Performance Parts Portfolio Expands, Offers New Products Including Drag Pak Rolling Chassis, Licensed Carbon Fiber Parts

- Direct Connection is the Dodge brand's performance parts portfolio, launched earlier this year through the Dodge Power Brokers dealer network
- Direct Connection Dodge Challenger Mopar Drag Pak Rolling Chassis gives NHRA and NMCA competitors a foundational building block to help create their personal drag car
- Direct Connection-licensed SpeedKore parts offer carbon fiber body panels for the modern-era Dodge Challenger
- Direct Connection offers licensed Finale Speed pre-1979 muscle cars, including a carbon fiber 1970 Dodge Charger body
- Direct Connection TorqueFlite 8HP70 eight-speed transmission — the same transmission used for 392 HEMI®-engine-fueled Scat Pack models — available for plug-and-play use with Direct Connection crate engines
- Direct Connection-licensed American Racing Headers for Dodge Charger, Challenger and Durango, made from 304 stainless steel, mate to the most powerful HEMI engines
- Direct Connection adds 2.7L and 3.0L supercharger kits to product lineup
- More information on availability, pricing and vehicle applications for new Direct Connection products will be announced at 2022 SEMA Show in Las Vegas, Nov. 1-4
- Direct Connection performance parts offered exclusively in-store or online through Dodge Power Brokers dealers; more information available at DCPerformance.com
- For complete information on Dodge and the brand's Never Lift plan, which provides a 24-month road map to Dodge's performance future, visit Dodge.com and DodgeGarage.com.

August 15, 2022, Auburn Hills, Mich. - Dodge unwrapped a full slate of new additions to its factory-backed Direct Connection performance parts line today, including a Direct Connection Dodge Challenger Mopar Drag Pak Rolling Chassis for grassroots drag racers, a Dodge Challenger body-in-white kit, Direct Connection-licensed carbon fiber SpeedKore parts, a licensed vintage Dodge Charger carbon fiber body from Finale Speed, licensed American Racing Headers for the Dodge Charger, Challenger and Durango, and more.

The new Direct Connection parts were announced at M1 Concourse in Pontiac, Michigan, during the three-day Dodge Speed Week series of events. Dodge Speed Week will include additional announcements on Dodge Gateway Muscle and Future Muscle products on August 16 and August 17, respectively.

"Not only do we listen to our Dodge owners, but the brand also delivers the performance products our street car enthusiasts, drag racers and vintage muscle fans need," said Tim Kuniskis, Dodge brand chief executive officer - Stellantis. "Direct Connection is a program that lives up to its name, offering a pipeline of new products, including a Drag Pak Rolling Chassis for our sportsman drag racers, new licensed carbon fiber panels to cut weight and improve performance, and many more new additions to our growing performance parts portfolio."

Drag Pak Rolling Chassis

The new Direct Connection Dodge Challenger Mopar Drag Pak Rolling Chassis offers a foundational blueprint for National Hot Rod Association (NHRA) and National Muscle Car Association (NMCA) competitors, giving the

grassroots racers that fuel the sport the tools to create their own vision of a drag race car. The Drag Pak Rolling Chassis with 4130 chromoly tubing and a fully TIG-welded roll cage is NHRA-certified for 7.50-second elapsed times.

The Direct Connection Drag Pak Rolling Chassis arrives already equipped with a four-link rear suspension engineered to launch hard and stay planted down the quarter-mile. Double-adjustable Drag Pak-specific tuned Bilstein coilover shocks, Strange Engineering 9-inch rear end and Strange Pro Series II racing brakes and Weld beadlock lightweight wheels with Mickey Thompson drag racing tires combine to provide racers a formidable quarter-mile package. Working off the Drag Pak Rolling Chassis, racers have the freedom to finish building their dream drag machine with the powertrain, driveline and engine management system of their choice.

Also for grassroots racers, a newly available Dodge Challenger body-in-white kit, delivered without the roll cage, is available with standard e-coat or with an optional choice of exterior vehicle colors for the 2023 model year.

The Direct Connection Drag Pak Rolling Chassis is available at a U.S. manufacturer's suggested retail price (MSRP) of \$89,999, while the Dodge Challenger body-in-white kit is offered at an MSRP of \$7,995. Both are available by contacting the Direct Connection Tech hotline at (800) 998-1110.

Carbon Fiber for All

Direct Connection is teaming with SpeedKore to offer Direct Connection-licensed carbon fiber parts for the modern-era Dodge Challenger. SpeedKore offers high-quality carbon fiber upgrades that meet or exceed Original Equipment Manufacturer (OEM) quality standards and shed weight through custom, lightweight carbon fiber. Direct Connection-licensed carbon fiber parts include the rear spoiler, front splitter, rocker panels and rear diffuser.

Direct Connection will also work with Finale Speed to license a 1970 Dodge Charger carbon fiber body which can be built into a complete, finished vehicle. The carbon-fiber-body vehicles, engineered to OEM body specifications, integrate the legendary look and feel of iconic muscle cars with the performance and technology of modern muscle. Future Direct Connection-licensed carbon-fiber bodies through Finale Speed will include the Plymouth Barracuda and Road Runner.

Modern Performance

Direct Connection also bolsters its modern performance portfolio with several new products, including:

- Direct Connection TorqueFlite 8HP70 transmission — the same transmission used in the 392 HEMI®-engine-fueled Scat Pack models — is now a plug-and-play option for use with Direct Connection crate engines, delivering greater torque capacity
- Direct Connection now offers 2.7L and 3.0L supercharger kits, based on proven superchargers from the Dodge SRT Hellcat Redeye production vehicle and Hellephant 426 supercharged crate HEMI engine, respectively, for grassroots racers
- Direct Connection-licensed American Racing Headers for the Dodge Charger, Challenger and Durango, made from 304 stainless steel, work with an X-pipe exhaust crossover system to handle huge HEMI engine power, including supercharged applications

More information on availability, pricing and vehicle applications for new Direct Connection products will be announced at the 2022 SEMA Show in Las Vegas, Nov. 1-4.

Dodge Brand's Direct Connection to Performance

The Direct Connection performance parts portfolio, launched earlier this year through the Dodge Power Brokers dealer network, includes four categories of products: modern performance, crate engines, drag pak, and vintage muscle parts.

Modern performance applications include 14 performance kits for the modern-era production Dodge Challenger, including a Challenger Hellcat Widebody Fender Flare/Fascia Kit and Challenger Hellcat Hood. In the Drag Pak category, Direct Connection offers kits for the Dodge Challenger Mopar Drag Pak, first introduced in 2008 as a factory-built, turn-key drag car for racers who compete in NHRA and NMCA events. Direct Connection offers 13 race-ready kits and four graphics packages for the Drag Pak, including a body kit and 354 supercharged HEMI engine.

The Direct Connection crate engines category features a horsepower-packed lineup of five popular crate engines. The lineup ranges from the 383-horsepower, 345-cu.-in. crate HEMI engine to the 1,000-horsepower Hellephant 426-cu.-in. supercharged crate HEMI engine. Direct Connection vintage muscle products are available for a variety of applications, including drivetrain, engine, suspension and exterior parts.

For full information on the Direct Connection portfolio, visit [DCPerformance.com](https://www.dodgeperformance.com). The Direct Connection Tech hotline at (800) 998-1110 is also available for assistance with technical questions.

Direct Connection

Dodge muscle was born in the 1960s, when Dodge innovated performance upgrades that led to domination at the track and drag strip. As the muscle car enthusiast community exploded, so did the desire for factory-backed go-fast parts. In 1974, Direct Connection launched as the exclusive source for performance parts and technical information, straight from the manufacturer. As an industry first, Direct Connection changed the game with a massive portfolio of performance parts sold through the dealer network with technical information and how-to performance upgrade guides.

Fast forward to today, and with the release of the most powerful and fastest production vehicles in the world, Dodge has become synonymous with high performance. With a new generation of muscle car enthusiasts looking for “ready to run” parts, Direct Connection returns as the new source for high-performance parts and technical expertise straight from the factory.

Dodge Power Brokers

Dodge Power Brokers dealers are equipped with staff trained to deliver a performance-focused customer experience. Power Brokers dealership features include:

- Network is the exclusive source for new Direct Connection performance parts
- Dealership staff meet set standards of comprehensive knowledge and expertise in high-performance areas
- Each Dodge Power Brokers dealer features a dedicated webpage with contact information and biographies on staff trained in high performance customer service
- Staff trained to walk customers through Dodge vehicle performance features and available Direct Connection upgrades
- Customers can purchase a vehicle with Direct Connection upgrades directly from a Dodge Power Brokers dealership
- Direct Connection Modern Performance parts installed by a Dodge Power Brokers dealer have the added benefit of maintaining the balance of the three-year/36,000-mile vehicle warranty (complete warranty details available at [DCPerformance.com](https://www.dodgeperformance.com))

Dodge//SRT

For more than 100 years, the Dodge brand has carried on the spirit of brothers John and Horace Dodge. Their influence continues today as Dodge shifts into high gear with a lineup that delivers unrivaled performance in each of the segments in which the brand competes while moving forward to a future that includes electrified muscle in the form of the next-generation, all-new Dodge Charger.

The next-generation Dodge Charger electrifies a legend, with the Charger retaining its title as the world's quickest and most powerful muscle car led by the all-new, all-electric 2024 Dodge Charger Daytona Scat Pack. The all-new Dodge Charger will also offer performance choices via multi-energy powertrain options including the 550-horsepower Dodge Charger SIXPACK H.O., powered by the 3.0L Twin Turbo Hurricane High Output engine.

Dodge also keeps its foot on the gas as a pure performance brand with the 710-horsepower Dodge Durango SRT Hellcat, the most powerful SUV ever, and best-in-class standard performance in the compact utility vehicle segment with the Dodge Hornet.

Dodge is part of the portfolio of brands offered by leading global automaker and mobility provider Stellantis. For more
